COMFORTCARE ABSORBENT BED PADS

Comfortcare waterproof reusable bed pads have been designed to provide maximum performance and protection for the user.

This product is designed to offer comfort, confidence and long term use. It can be washed and reused many times, and the absorbency increases after the first few washes.

Made from the finest materials the Comfortcare Reusable Bed Pad consists of three functional layers. The top layer allows liquids to quickly pass through whilst the top surface remains dry and comfortable for the user. The liquid is locked away in the middle layers and the waterproof breathable polyurethane backing prevents penetration of the liquid to the mattress.
